EDUCATION

Indian Institute of Information Technology, Nagpur

B.Tech, Electronics and Communication Engineering

Aug 2023 – May 2027

Nagpur, India

EXPERIENCE

Backend Developer Intern

May 2026 – Present

Munshot

Remote

- Engineered scalable backend APIs using **Python, FastAPI, and GraphQL**, enabling efficient data exchange and seamless integration across application services.
- Automated web application testing with **Selenium** and optimized SQL queries, improving reliability and reducing manual testing effort.
- Collaborated on AI-powered backend features following clean-code practices and agile methodologies.

Java Full Stack Developer

Jan 2026 – Apr 2026

Amdox Technologies

Remote

- Designed and built end-to-end web apps using **Java, Spring Framework, Hibernate, React, and Angular**.
- Developed server-side business logic and wrote complex **SQL/NoSQL queries**, maintaining database integrity for production systems.
- Debugged, tested, and optimized application performance across all stack layers in an Agile environment.

PROJECTS

FinBot | [GitHub](#) | *FastAPI, React, LangChain, OpenAI API*

Jan 2026

- Built and deployed a full-stack AI personal finance agent processing real bank statements (PDF/CSV) with zero manual parsing setup, using a **FastAPI** backend and **React** frontend.
- Designed a REST API with `/chat`, `/upload`, and `/transactions` endpoints; integrated **LangChain + GPT-3.5** for agentic multi-turn financial conversations.
- Engineered 4 custom LangChain tools — spending summary, savings advisor, anomaly detector, and monthly trend analysis — for natural language queries over financial data.

CollabCode | [GitHub](#) | *Node.js, Socket.io, React, OpenAI API*

Oct 2025

- Built a real-time collaborative code editor supporting multi-user simultaneous editing with zero-latency sync using **Node.js, Socket.io, and React 18**.
- Architected a **WebSocket + REST API hybrid backend** managing room state, cursor sync, and live user presence; deployed on **Railway** and **Vercel**.
- Integrated **OpenAI GPT-3.5** for two AI features: an inline code reviewer (`/api/hint`) and an autocomplete engine (`/api/complete`).

TaskFlow API | [GitHub](#) | *Node.js, Express, SQLite, Docker*

2025

- Built a production-ready **REST API** with JWT authentication and role-based access control, plus full CRUD task management with pagination and filtering via **better-sqlite3**.
- Hardened the API with **helmet**, **express-rate-limit**; containerized with **Docker Compose** and documented via auto-generated **Swagger UI**.

Resume Screener | [GitHub](#) | *Java, Spring Boot, React, MySQL*

May 2025

- Built a full-stack AI-powered resume screening tool with a **React** frontend and **Spring Boot REST API** backend enabling recruiters to score and rank candidates.
- Designed REST endpoints for job creation, resume submission, and ranked candidate retrieval backed by a **JPA relational database** with query-sorted results.
- Integrated **OpenAI GPT-3.5** to generate match scores (0–100) and actionable feedback, with a keyword-based fallback for system resilience.

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, SQL, R

AI Frameworks: LangChain, OpenAI API, Prompt Engineering, TensorFlow, PyTorch

ML / Data: Scikit-learn, Pandas, NumPy, XGBoost, OpenCV

Backend & APIs: Node.js, Nest.js, Express.js, Spring Boot, FastAPI, Flask, Socket.io, REST APIs, WebSockets, JWT Auth

Databases: MongoDB, MySQL, PostgreSQL, H2, JPA/Hibernate

Frontend: React.js, Next.js, Angular, Vite, HTML5, CSS3

Tools: Git, Docker, Postman, Railway, Vercel, Power BI
